About AslanKonge

AslanKonge

AslanKonge is the new ruler of the cryptocurrency world and the King of DeFi.

We are featuring new generation KongeFi launchpad, esports integration, the high rewarding system and much more. Also we have in plans developing a KongeSwap and our own blockchain. All of the above make AslanKonge one of the most promising crypto projects yet.

KongeFi is a decentralized launchpad by AslanKonge. The main idea was to create the safest presale and fair launch platform. When fair launch is live, liquidity will be locked instantly. No more rug pulls or honeypots! Contract creators have to verify their identities before starting a sale or publishing a project. If they scam, we will put their documents into the Scam Alerts tab. There is no need to lose control of your contract by renouncing ownership.

You can provide additional safety for your community by transferring ownership to KongeFi. We will take care of any changes you want to make except the scam ones.

Also, one of the features is **passive income**. It means that you will receive up to **20%** in BUSD straight to your wallet every three hours simply by holding a minimum amount of **200,000 KONGE**.

Tokenomics

AslanKonge

Each buy transaction is taxxed a 15% fee.
8% are going for BUSD Rewards
4% are for Dev & Marketing
3% are going to Liquidity pool.

Each sell transaction is taxxed a 19% fee.

10% are going for BUSD Rewards
6% are for Dev & Marketing
3% are going to Liquidity pool.

On the first day we have an extra 10% tax to avoid huge dumps after the launch. It will be used to reward holders.

An extra tax will be lower each day. On day 10 and later there will be left only regular 19% tax. We strongly believe that this system will help to maintain this project long-term.

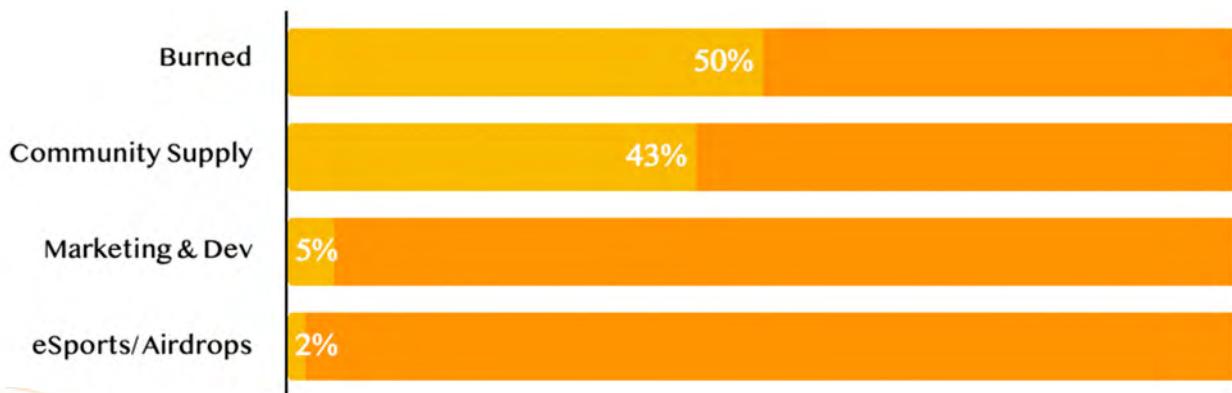

A Breakdown of Wallets

AslanKonge

Total Supply: 100,000,000,000 KONGE

Liquidity will be locked on DxSale till the end of a year.

*Starting January first, 90% will be locked for a year,
and 10% is redistributed back to the community
(as a yearly "dividend" in proportion to your holdings).
This will happen year after year.*

*50% of the total supply
will be burned before the launch.*

*Marketing & development funds
will be used to develop features
and to constantly grow AslanKonge.
Marketing will never stop.*

*We need eSports & airdrops wallet
for eSports and community airdrops.
There will be plenty of them.*

eSports Integration

AslanKonge

With AslanKonge we strive to combine eSports with cryptocurrency, which in its own form and right is a very competitive platform where every coin strives to be better than the next.

eSports describes the world of competitive, organized video gaming.

Competitors from different leagues or teams face off in the same games that are popular with at-home gamers: Fortnite, League of Legends, Counter-Strike, Call of Duty, Overwatch and Madden NFL, to name a few.

Our community will have the chance to support their favorite player or team by placing bets using the KONGE token whenever they are live in a tournament.

In addition, our “gamblers” will be rewarded if their respective player/ team wins.

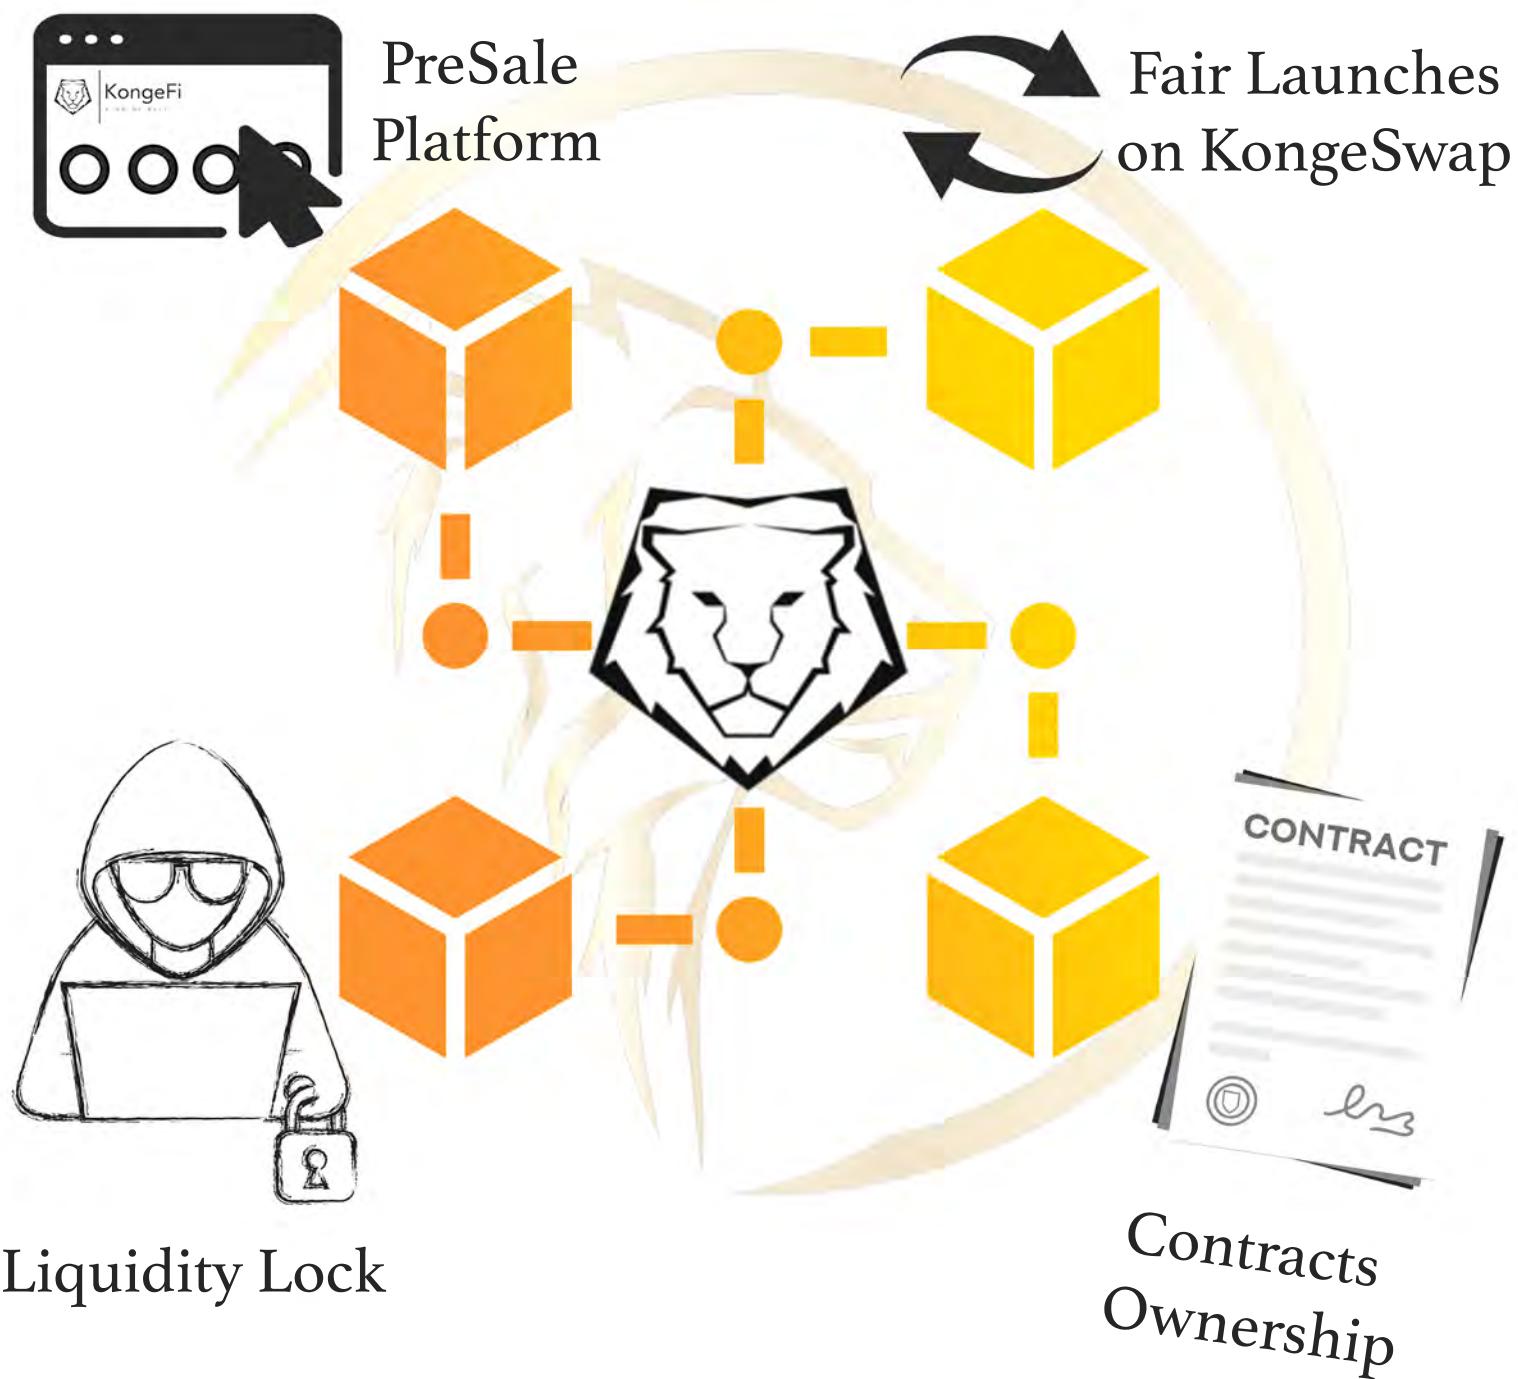

KongeFi Launchpad

AslanKonge

KongeFi is a decentralized launchpad by AslanKonge.
SAFE Launches, Scam Alerts, Sale Creators' IDs Verified

Roadmap

Q1

1. Social Media Set Up
2. Marketing With Top Influencers
3. Contract Deployed on Bscscan
4. Listings on Various Voting Platforms
5. Audit by Techrate
6. Launch on PancakeSwap
7. Blockfolio Listing Request
8. Coingecko Listing
9. CoinMarketCap Listing

Q3

1. KongeSwap Development
2. Merch Airdrops
3. Partnership Announcement
4. Website Translation Into Multiple Languages
5. KongeMerch Retail Chain
7. Top Exchanges Listings
8. eSports Launch
9. KongeFi Launchpad Beta Testing

Q2

1. Online AslanKonge Merch Store Opening
2. Expanding the Team
3. Certik Audit
4. AslanKonge Mobile App Development
5. Esports Procedings
6. Setting Up Main Office in England
7. More Listings
8. KongeFi Dashboard

Q4

1. Esports Betting Mobile App Integration
2. Launch of KongeFi Decentralized Launchpad
3. Listings on Top Exchanges
4. Looking Into Integration of Real Life Betting
5. Liquidity Staking
6. Implementation of Casino Esports Style
7. Roadmap Refresh
8. Listings on Binance and Coinbase
